

## Create A 3D Section and Assigning Keyboard Shortcuts

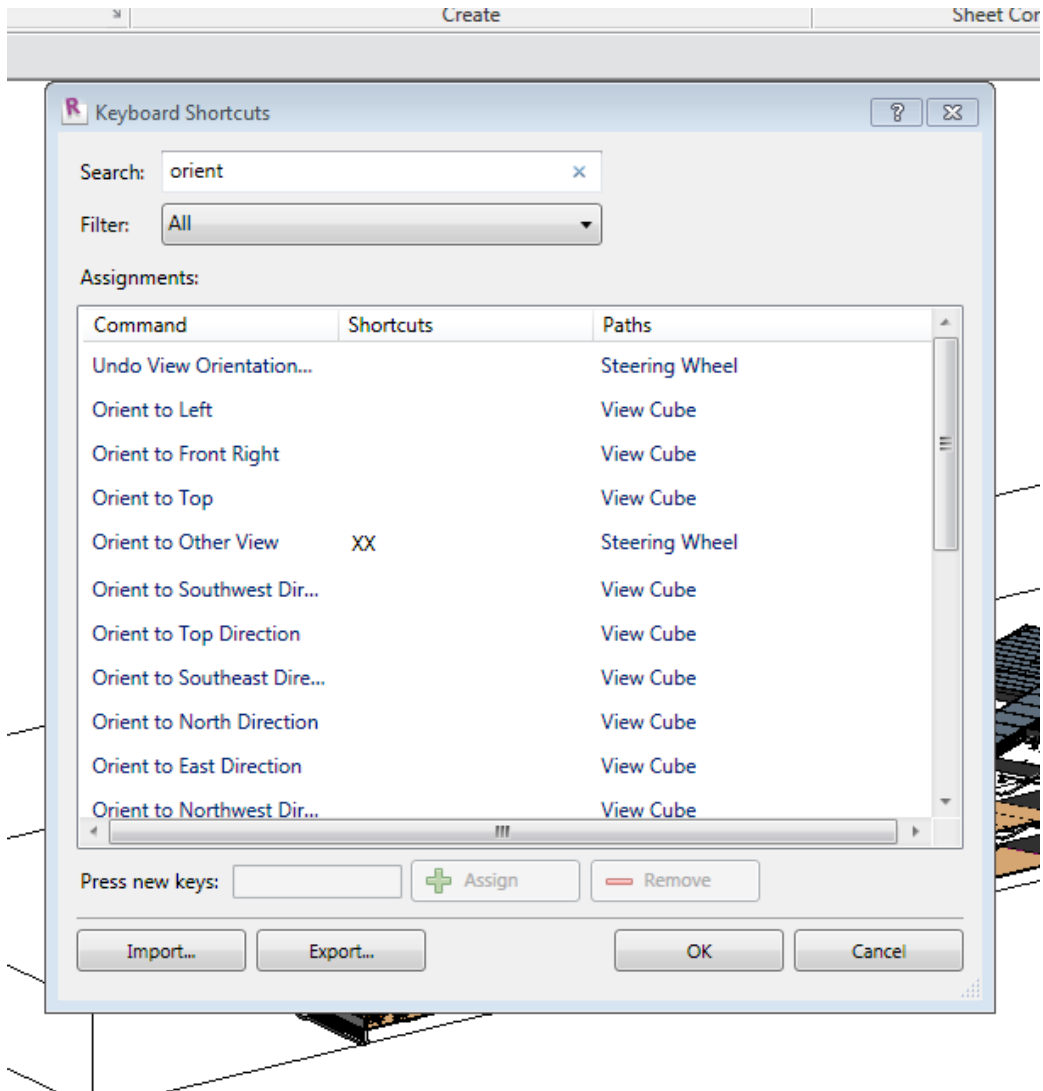

- Assign Keyboard Shortcuts by typing “KS”
- Search section and assign it a two letter shortcut (i.e. “SC”)

- Create a duplicate view of the default 3D view and rename it appropriately.

- Create A Section In Plan View and rename it appropriately
- Go back to the copy of the 3D section and assign a keyboard shortcut for “orient to other view”

- In the 3D view type your keyboard shortcut and then select the desired section
- The 3D section will then appear
